

Department of Early Childhood Education

The Department of Early Childhood Education aims to nurture the creative and competent early childhood teachers and professionals demanded by the new and changing information age and globalization era by cultivating academic knowledge and practical ability for early childhood education combined with theory and practice. Students who graduate from this department will first enter the national, public, or private kindergarten and daycare center to teach the children on-site. In addition, if you want to pursue another field, you can work in a child welfare related area or early childhood education institutions and general institutions (broadcasting stations, media companies) to utilize your expertise. In addition, you can continue your studies to become an early childhood education researcher or specialist.
